

# Asset Inspection 1-Pager Overview

1

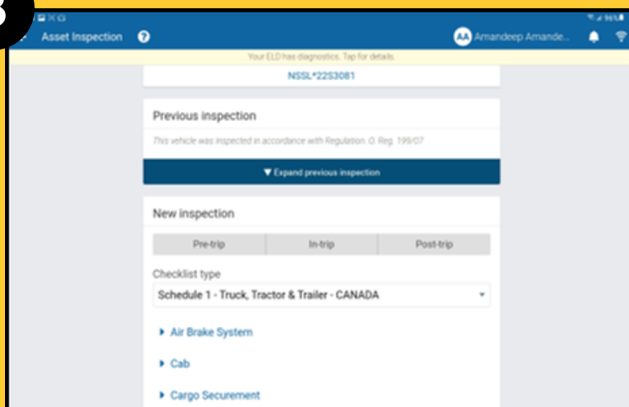

To begin, locate the **Asset Inspection** tab on the home screen and select it.

2

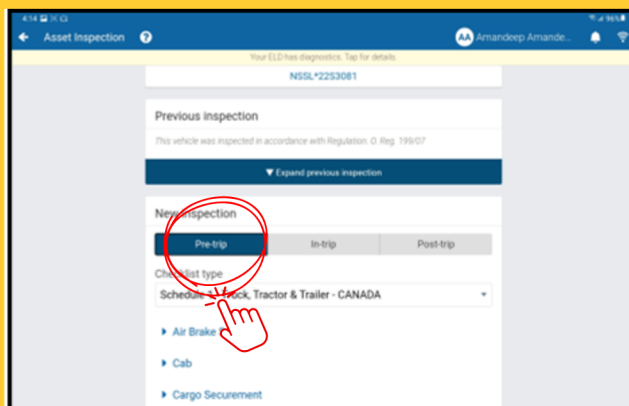

Select the **Inspect** button on the Asset Inspection page.

3

You will be directed to the **Inspection** page where all inspection items are listed and can be selected if any defects are found.

Select the type of inspection you will be conducting: **Pre-Trip, In-Trip or Post-Trip**.

In this scenario, **Pre-Trip** will be selected as an example.

# Asset Inspection 1-Pager Overview

4

## SCHEDULE 1 CHECKLIST

By default, the Schedule 1 checklist is automatically selected.

Verify the checklist before conducting your inspection and change it if needed by tapping the drop-down list.

## SAFETY STICKER CHECKLIST

Always ensure you check the validity of the safety sticker.

Check the box if the sticker is valid.

5

For **Inspection Location** scroll down the inspection list to locate the inspection location section.

This will automatically be selected by the system.

If required, select the **Edit** button to manually update the location.

If there is any additional information you would like to note that is not directly related to the inspection, use the **Remarks** section.

Once done, click on the **Green Tab** if no defects found.

6

When you submit the inspection, the system will ask you to **sign** the inspection.

Click on **Yes** to sign and submit.

The system will automatically return you to the home screen.

You may now proceed to your destination where you have to hook a trailer.
